We are committed to climate smart strategies which demonstrate that ecosystem-based mitigation and adaption offer tremendous opportunities in achieving climate resilience.

WIRRED offers nature base solutions geared towards building habitat, increasing biodiversity, and sequestering carbon, while reconnecting people to nature through eco agritourism and educational experiences.

The organization believes that successful regenerative development requires a multi-sector network that includes the private sector, public sector, academia, and the community. At the centre of these partnerships is one common focus - a shared love for people, equity, equality and the environment.
